

SUCCESS EPITOMIZED

Success is predictable when you have the right keys.

APPLICATION DEVELOPER

Objective

A great Application Developer has excellent knowledge of at least one programming language. They must be familiar with a variety of operating systems and platforms. The ideal candidate will also have an analytical mindset and a keen eye for detail. The goal is to write "clean" and flawless code to produce fully functional software applications according to requirements.

Essential Duties & Responsibilities

- Understand client requirements and how they translate in application features
- Collaborate with a team of IT professionals to set specifications for new applications
- Design creative prototypes according to specifications
- Write high quality source code to program complete applications within deadlines
- Perform unit and integration testing before launch
- Conduct functional and non-functional testing
- Troubleshoot and debug applications
- Evaluate existing applications to reprogram, update and add new features
- Develop technical documents and handbooks to accurately represent application design and code

Qualifications

- Proven experience as application developer
- Experience in designing and building applications
- Ability to program in at least one programming language such as C#, Java (J2EE), etc.
- In-depth knowledge of programming for diverse operating systems and platforms using development tools
- Excellent understanding of software design and programming principles.
- A team player with excellent communication skills
- Analytical thinking and problem-solving capability
- Great attention to detail and time-management skills
- BSc/BA in computer science or relevant field; MSc/MA preferred
- Certified application developer preferred
